secure display**

Freedom Micro® II Family

More adaptive to any environment.

Powerful solutions.

Secure your devices with an elegant, uniform aesthetic across all locations and environments with custom security levels tailored to each position, store location and environment.

A secure, customer experience.

With power supplied from within the riser, your displays are free from unnecessary cords and always ready for use.

Get to know our family.

Freedom Micro® II

The perfect balance of security and high customer experience.

Freedom Micro® II Lite

The perfect choice for showcasing your products.

Freedom Micro® II HS

High Security protection that delivers a great customer experience.

Freedom Micro® II M

Supporting a uniform look for less theft prone targets.

Freedom Micro® II M HS

When protection and security is paramount.

MORE TO OFFER.

Freedom Micro® II Family

The Freedom Micro® II Family delivers value above and beyond product security. Through it's unique modular design merchandising is easier and quicker than ever, allowing sales staff to focus on engaging customers improving the Return on Display™.

Simple installation.

Fits into your existing fixtures without the need for costly, time consuming fixture modifications.

Modular design.

Move between models with ease to match the security you need or swap for maintenance for quick resolution.

Durability and Longevity.

Our products have a track record of 5+ year service life compared to other providers whose products often fail in a year or less.

Save time and money.

Introduce new products faster.

Improve in-store efficiency with fast, new product introductions. Extend the life of your investment with our Universal SpeedBracket™ and SpeedPlate™ options, built to accommodate almost any device, without messy VHB adhesives.

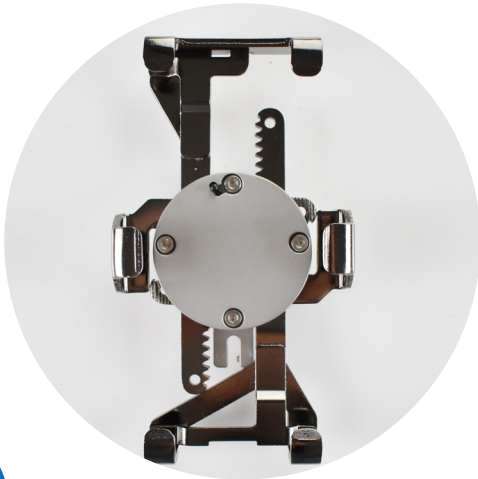

The SpeedBracket™ was designed with interdependent arms adjusts, auto aligns and consistently centers phones and tablets for a clean and easy installation.

Improve daily operations.

Unlock in-store efficiency for daily merchandising.

To merchandise, simply click the SpeedBracket™ into the riser and plug in the cable. When you're ready to remove, turn and release with the MTI tool.

Freedom Micro® II HS

More protected.

Armored Security.

Our unique braided SteelTether™ draws smooth, yet provides unparalleled cut protection with smash and grab theft resistance up to 700 lbs.

Delivered in a retail hardened metal riser, Freedom Micro® II HS is ready to protect your investment from the most aggressive thieves.

Powerful alerts.

Freedom Micro® II HS alarms when theft events are detected and can lock down with a simple tap of the Versa Key™ if a threat is observed in store.

Excellent experience.

Encourage shoppers to lift, feel, and fully experience your latest devices. Freedom Micro® II HS is secure behind the scenes, allowing the customer to try freely, without feeling locked down.

Freedom Micro® II M HS

More reinforcement.

Armored Riser.

Delivered in a retail hardened metal riser, Freedom Micro® II M HS is ready to protect your investment from the most aggressive smash and grab theft attempts.

Fully Mechanical.

Self-contained mechanical solution supporting landscape and portrait orientation.

Speed Bracket™ Compatible

The Freedom Micro® II M HS is fully compatible with the universal Speed Bracket™, for the fastest, easiest secure merchandising solution with no messy adhesive.

Freedom Micro® II

More simplicity.

Best of both worlds.

The Freedom Micro® II is our all-around best value option for retailers needing to protect valuable devices without compromising the shopping experience.

It's clean, low profile design allows the device to be the hero, while the internal construction works hard to stop opportunistic theft attempts.

Flexible Protection.

Freedom Micro® II provides power and flexibility with a long, lightweight steel-braided AirTether™, ensuring minimal impact on the demo experience.

Powerful alerts.

Freedom Micro® II alarms when theft events are detected and can lock down with a simple tap of the Versa Key™ if a threat is observed in store.

Freedom Micro® II Lite

More experience-driven.

Premium shopping experience.

Our Freedom Micro® II Lite was built with the customer experience in mind, offering a premium shopping device experience at a low cost for store locations or environments less susceptible to theft.

Tension free.

The unique coil cable is tension free, allowing the customer to observe the full weight and feel of the device.

Freedom Micro® II M

More for show.

Fully Mechanical.

Low-cost, mechanical only display built to enhance the look of dummy/mock displays that do require security.

Consistent look.

Outfit your store with a clean, uniform look, consistent with all products in the Freedom Micro® II family.

Mix and match.

No additional investment required. Leverage the same tools and accessories compatible with the Freedom Micro® II family

More selection.
