Freedom Micro® II HS
Next Gen of the World's #1 Merchandising Solution

High Security. High CX for Tablets & Phones.

- **Armored Security.** Built to withstand smash and grab theft with more than 700 lbs. (320 kg) pull strength, delivered in a beautiful hardened metal riser, universal SpeedBracket™, and reinforced SteelTether™.

- **Fastest NPI.** The SpeedMount™ system keeps your products secure with no adhesive to remove, no loose parts and no custom brackets. Swap to a new phone in under 30 seconds saving you time and launch expenses.

- **Low Maintenance Costs.** Modular design. Parts are easily swapped to reduce repair and maintenance costs with replaceable SteelTether™, puck, riser. base plate and universal bracket. No costly custom brackets needed for new product introductions.

- **Merchandise in Seconds.** No Keys. No Tools. Simply click the SpeedBracket™ into the riser, plug in the cable. Done!

WORKS WITH
MTI Connect®

Optional Hidden Steel Safety Anchor. 2mm diameter steel aircraft cable with 1k pounds of tensile strength.

Features and Benefits

Modular Design. The Freedom Micro(R) II family offers multiple security options in one sleek design. You can move between models with ease to match the security you need.

Auto Alignment. SpeedBracket™ designed with interdependent arms adjusts, auto aligns and consistently centers phones and tablets for a clean and easy installation.

Instant Remote Lockdown. The only product that lets you lock down all devices remotely at the push of a button with MTI Connect®.

Sales Engagement. Up to 5V, 3A charging to keep the latest devices charged for live demos. Reinforced 17 in/43 cm tether maximizes the customer experience without sacrificing security.

High Return on Display™

With nearly 80 patents, our innovations don't stop at product security. We deliver bottom-line improvements to reduce maintenance costs, decrease merchandising time, simplify installation, and improve the total cost of ownership—which we call **Return on Display™.**

Streamlined NPIs. On the new, low-cost SpeedMount™, VHB moved from the puck to the riser for faster and easier roll outs.

Universal SpeedBracket™. Auto aligns to consistently center device. Secure arms with one screw for fast installation.

De-merchandise in Moments. A quarter turn of the MTI Tool lets you remove devices in a quick, fluid motion.

Sleek Look. The puck now stays with the riser for a cleaner look when products are off the floor for nightly storage.

Modular Design. Parts are easily upgraded between models and swapped for maintenance: replaceable tether, puck, riser, base plates and brackets to keep R&M costs low.

Configurable, Easy Integration. Fits into your existing fixtures without the need for costly, time consuming fixture modifications.

MTI

Versa Key™. Fast, Reliable & Secure Access

The industry's easiest to use, lowest cost, and most reliable key.

Low Cost. Versa Key™ is low cost, so you can afford to outfit your entire team. Lose a key? No worry. Versa Key™ can be deactivated with a few keystrokes.

Increased Speed of Service. No more waiting for a key. Eliminate customer wait times and increase sales.

Secure. Proprietary data formats and encrypted RFID technology make the Versa Key™ the most secure key in your store.

Faster. Keys that work the first time. Every time. RFID technology arms/disarms products with a simple tap.

Fool Proof. Tired of forgetting to charge the key? Versa Key™ doesn't require charging, syncing, and won't break.

MTI Connect®

Smart Retail IoT Platform. Combines MTI's smart security products with cloud software in an open platform to reduce costs, improve customer experience and increase sales.

Powerful Insights. The MTI Connect® Mobile App and Reports provide powerful insights from the sales floor to corporate. Improve store operations with employee enablement tools: in-store execution tasks, actionable device readiness alerts, loss prevention tools and corporate-level dashboards.

Actionable Health, Compliance and Security Info. Device-level detail to identify problems and solutions before they impact the bottom line.

Engagement. Consumer engagement (lift) metrics by day, time, make and model to correlate with device sales, employee schedules and marketing campaigns.

Managed Access. Every employee is accountable, stopping theft cold. And every employee has access to merchandise, so they sell with maximum efficiency.
